MRI Applications	TRANSDUCERS	FILTERS		Cables						
CABLE/FILTER SYSTEMS	Transducers	MRIRFIF	MRIRFIF-2	MECMRI-1	MECMRI-2	MECMRI-3	MECMRI-4	MECMRI-5	MECMRI-6	MECMRI-OXY
MECMRI-BIOP  Connect electrodes to the subject in the MRI chamber and then to a biopotential amplifier in the control room.	ECG100C EEG100C EGG100C EMG100C EOG100C ERS100C	X	X	X	X					
MECMRI-TRANS  Connect electrodes to the subject in the MRI chamber and then to a transducer amplifier in the control room.	GSR100C RSP100C SKT100C	X	X	X		X				
MECMRI-DA  Connect directly to -MRI transducers in the MRI chamber with the DA100C in the control room.	TSD104A-MRI TSD117-MRI TSD121B-MRI	x	x					X		
MECMRI-HLT  Connect directly to -MRI transducers in the MRI chamber with the HLT100C in the control room.	TSD115-MRI TSD131-MRI	x	X						x	
MECMRI-OXY  Connect directly to TSD123A/B  Pulse Oximetry transducers in the MRI chamber with the OXY100C in the control room.	OXY100C		X							X
MECMRI-STMISO  Connect to STMISO and STM100C in the MRI control room.	STIMISOC/D/E to STM100C	x	X	X			X			
No Cable/Filter Sys. required Use AFT30XL tubing and a transducer in the MRI chamber and connect to the TSD160A and DA100C in the control room.	TSD110-MRI TSD114-MRI
